Experience

Full Stack Developer with RMCI — Feb 2021 - Present

- My time with RMCI was working on contract with the Office of Personnel Management (OPM)

- Worked in month long sprints updating, correcting bugs, and adding new features to the online applications USAJobs and USAStaffing.

- Worked on a team of business analysts and other developers to meet deadlines for clients

- Worked with the migration of codebase from a TFS based repository to Git repository

Front End Developer with Thorium Design — Sept 2021 - Dec 2021

- Worked with VueJS to build applications hosted on the cloud using Netlify and Github

- Maintained a dashboard for online ordering for an e-commerce site

C# Full Stack Dev with Rocky Mountain Arsenal — Oct 2020 - Jan 2022

- Convert owned applications from ASP Classic and Java to the .NET 5 framework

- Moved Applications from on premise hosting to cloud based hosting using AWS

- Created single paged applications with Blazor, and local storage for users that do not internet connection to be able to add data concerning wildlife and vegetation life on the refuge.

C# Full Stack Dev with Department of Commerce — May 2019 - May 2020

- Built a crowdsourcing application for first responders utilizing first access on 5G networks

- Experience in text analytics generating data visualization in Python

- Skilled in performing data parsing, data manipulation, cleansing and preparation with methods including data contents, descriptive statistics for data, regex, data split and combining

- Skilled in transforming business requirements into analytical models, designing algorithms, building models, developing data mining and reporting solutions that scale across structured and unstructured data sets.

C# Developer Department of Defense — NOV 2017-APR 2019
My time here was split between 3 contracts as displayed below:
VOR Technology Nov 2017-July 2018 | ASET Partner July 2018-Sept 2018 | Zenith Advanced Solutions SEPT 2018-April 2019 - Worked on multiple projects in sprints to update existing software for the Air Force

Front End Developer with Wayne Reave Software — Jan 2013 - Nov 2014
- Built custom websites for customers

- Maintained and added components to existing websites

- Trained users on how to upload their inventory list from their desktop application that was provided by Wayne Reaves to the website.

- Also trained users on best practices for SEO when adding content to their site.
